### **Franklin Communications receives Printing Industry Honor as Best Workplace in the Americas**

**MIAMI, FLORIDA – November 17, 2006** – Printing Industries of America/Graphic Arts Technical Foundation (PIA/GATF) announced today that Franklin Communications has been recognized as a winner in the 2006 Best Workplace in the Americas Awards. Franklin won in the medium-sized company category of 101-250 employees. The award recognizes graphic arts companies that exhibit outstanding human relations efforts that contribute to a successful workplace. The categories in which companies are judged are: recognition and rewards; health and well-being programs; financial security; personal/work/life balance; work environment and organizational culture; and training and development opportunities.

“We are very proud of our efforts towards our workforce and workplace,” said Peter J. Dunne, President of Franklin Communications. “Our extremely low turnover rate is an indicator of how we care for our employees. Some staff have been with us over 30 years.” Jim Kyger, HR director for PIA/GATF, agrees. “While almost every company that entered this year’s competition has HR programs they should be proud of, The Best Workplace program recognizes outstanding accomplishment. Franklin has achieved an outstanding milestone.”

Franklin Communications offers complete graphic communication services including design, state of the art pre-press, sheetfed and non-heatset web printing, variable data printing and a full compliment of finishing and mailing services. Franklin additionally offers web-based ordering and fulfillment systems, database services, and customer access to current and historical job data.
